

WHAT IS RPA?

Robotic Process Automation (RPA) is the technology that allows to develop a software robot which can emulate and integrate the actions of a human interacting within digital systems to execute a business process. These robots can utilize the user interface to capture data and process data just like humans do. They can interpret, trigger responses and communicate with other systems to perform a variety of repetitive tasks, without being prone to human-like errors. Above all, they work 24 x7.

OUR OFFER

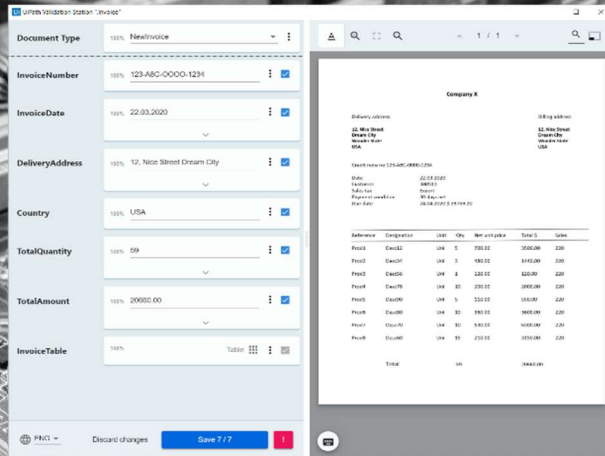

We will do a proof of concept (POC) project for you at a pre-agreed competitive price, and you pay only if you are satisfied. That is something better than a money back guarantee!

ROBOTIC PROCESS AUTOMATION

Invoice Processing

www.acruxtek.com

“Using Agile methodology, we build bespoke software robots for invoice processing which work on 24x7 basis and reduce invoice processing time up to 75%”

*Nasir Uddin Khan
CEO Acrux Technologies*

BENEFITS

- Improved AP accuracy
- Reduced operational costs
- Increased efficacy
- Free employees from repetitive tasks
- Reduced invoice processing time

JOIN THE AUTOMATED INVOICE PROCESSING SOLUTION

- The function of invoice processing and Accounts Payable is transforming rapidly. Invoice processing automation is at the heart of this transformation.
- In recent years, organizations have been keen to adopt this innovation to improve their efficacy and reduce costs to stay ahead of the competition.
- Acrux Technologies is a leading innovator in this space, collaborating with industry experts, users, partners to continuously drive innovation that helps you solve real world challenges.
- We are ready to help you build your future.

AP BOT

Our invoice processing bot, developed using UiPath, has the following capabilities – more can be built, as required:

- AP email operations
- Invoice data extraction
- Invoice data validation
- Error reconciliation
- Posting of invoice data into the AP application
- Generation of process logs

We love **UiPath™**
No 1
in all major independent user review sites for RPA
